Advance Lifts 4,000 Lb. Cap. Lift Tables (NW-1014) **NEW**

Model #: P-4036, 36 In. Travel If it's heavier loads you're dealing with then you need this 4,000 lb. capacity Standard Duty lift table. For longer life, the legs, like all Standards and Deluxe Duty lifts, are formed, drilled and reamed in a machining center for exacting tolerances rather than rough flame cut and hand ground for final fit-up. (Available with 24, 36, 48, 60 In. Travel)

Lift Products MAX-LIFT Scissors Lift Tables **NEW**

The best value in lift tables with unparalleled features! Reduces awkward bending and lifting since the work load is always at the correct level. The possibility of back injuries is also reduced and productivity is increased. The MAX-Lift is a superior scissor lift table currently offered in the 2000-6000 lb capacity range.

Quotes Available

Lift Products ROTO-MAX Lift Tables **NEW**

The Ultimate in Ergonomic Work Positioners

Roto-Max was designed from the ground up with the operator in mind. The Roto-Max electric hydraulic work positioner places the load at the operators discretion to determine where he or she would like the work load positioned. The Roto-Max allows complete flexibility to do the ergonomically safest job with maximum efficiency. Whether the load is one pound or 3,500 pounds, the positioner height does not change until the individual wants it to change. With a lowered height of only 6.5", an operator has easy access to the top layer of product. The raised height of 32.5" (plus pallet height) is ideally suited for most applications. The 43" diameter top rotates easily, thus giving the operator access to product without having to stretch or walk around.
