Meber LEM Stroke Sander

Year/Cond: 2002. Voltage: 230/3PH/60Hz. \$6,500

Opti-Sand Rotary Sander

The Opti-Sand Rotary Sander is designed to completely and thoroughly finish sand and sealer sand work pieces such as raised panel cabinet doors, entry doors, louvers, shutters, etc. It has four spindles mounted on a sanding deck that continuously rotates creating different angles allowing the abrasives to attack all surfaces of the work pieces. This action ensures that all surfaces are thoroughly and uniformly sanded. The sanding deck adjusts up & down for different work piece thickness and abrasive wear. Work pieces are held on the conveyor belt by the built in variable vacuum hold down system or dual track conveyors. The touch screen control is conveniently located for easy access. Spindle speeds, head rotation speeds, conveyor speeds & vacuum hold down are inverter controlled with push button adjustment & readouts. Sanding height is push button adjusted with readout. Call Us **920.452.4494**

Opti-Sand L202 Moulding Sander

The Opti-Sand Moulding Sander is designed to thoroughly and uniformly finish sand and sealer sand work pieces such as mouldings, trim, flooring, etc. The Opti-Sand Moulding Sander has two or more horizontal top spindles & can have two or more vertical side spindles and/or two or more horizontal bottom spindles to sand the various surfaces of the work pieces. All spindles are adjustable for different part sizes as well as abrasive wear. The top & side spindles are tilt-able for optimum sanding. Full width pressure rollers easily adjust by hand crank to hold the work pieces firmly on the power conveyor & against the rear guide fence. Call Us **920.452.4494**

Safety Speed Cut Wide Belt Sander: 3760 (NW-2012) **NEW**
